

NO ASSEMBLY REQUIRED

That means no screws necessary. We use magnet technology, so once your old grille is removed, ours will simply snap into place. This also makes changing filters a breeze!

PERFECT FIT EVERY TIME

Our cover sizes are based on standard filter sizes, so they should fit perfectly. But if your existing framework isn't quite right or your box isn't magnetic, we provide the tools to ensure your cover will work in your home.

MAKE IT YOUR OWN

Our air covers are made with quality natural wood and are sold primed and painted or you can purchase them to stain yourself.

Decorative Vent Covers

UPGRADE YOUR SPACE

Decorative air intake covers are made to replace the unattractive covers in any living space. Vent air covers will add a piece of art to hallways, living rooms or any space of a home or office, bringing unique and inspired designs into your life.

IMPROVE AIR FLOW

Our vents are guaranteed for maximum performance. Each design is tested to ensure it works with your HVAC system and improve the flow of air in your room. We have the data needed to give you piece of mind in purchasing one of our covers.

Set Your Home Apart

All you need is the size of your intake filter, then choose the design that best fits your style. Modern or traditional,

we've got you covered. You will be amazed at how decorative wall vent covers can enhance your space.

Are you an **interior designer, decorator, architect, home builder or a homeowner?** Together, we can add the missing touch to the most overlooked item in a room: the air intake grille and vents! We have designs to fit your customer's style and if we don't, we can custom make one just for you.

Still not sure? We have the air flow data for each design, as well as 3D renderings (STEP files) to use in design software (CAD, etc.), to help make this an easy decision.

Standard sizes are painted in one of our 8 standard colors.

For a stained option, please contact us for pricing.
